

README - How to Install Pulsor

Open a new Live Session if you already haven't one.

Drag the folder "Pulsor by Amazing Noises" that you find in the folder "PULSOR 1 and 2 Installer" into your **User Library/Presets/Instruments/Max Instrument** folder, using the Live 9 Browser, see the picture below.

Do the same for the folder "Pulsor 2 by Amazing Noises"

Please don't put this folder into a subfolder or in another location otherwise you could not load the presets properly.
